

Description

Sycor's Technology has many solutions for your wire identification needs. Wire marking can be in the form of fixable labels or tags, printed heat shrink, clip-ons and even permanent printing or stamping of the wire.

Printable and self laminating labels are easily made with custom print and are a good choice for wire harnesses and cords.

Sycor technology is also able to print custom text onto heat shrinkable wire markers allowing for customizable lengths and fonts. These markers are oil & moisture resistant and can conform to odd shapes and will snugly fit around your wires and cables. Heat shrinkable wire markers are a durable and simple solution for your wire management and identification needs.

Sycor technology can also offer wrap-around and clip-on wire markers, available in various constructions and standard markings. Give us a call and a member of our friendly and knowledgeable sales team would be happy to assist you in fulfilling you wire marking needs!

Applications

Sycor's Wire Markers are a strong choice when circuit identification is essential such as in panels, electrical contracting, utilities, telecommunications and mass transit applications. Most wire markers are resistant to moisture and abrasion for durability.

Type of Wire Marking	Applications	Temperature Rating
Printable wire markers:	Automotive, Industrial & Computers	-40 °C to 80°C
Self-laminating labels:	Applications requiring high resistance	-196°C to 388°C
Identification tags:	Removable & Reusable — cost efficient	- 40 °C to 120°C
Heat Shrink identification tubing:	Underground, Railroad, Marine	-65 °C to 135°C
Identification ties and plates:	Larger pipes and cables	-40 °C to 85°C
Clip on wire markers:	Very easy & fast— Industrial applications	-40 °C to 85°C
Heat stamping:	Cost effective permanent identification	Varies by cable material
