

Speaker Wire

Description

Stranded, parallel conductors consisting of both conductors being bare copper or one conductor tinned copper and one conductor bare copper.

Application

To connect speakers to amplifiers

Construction

PVC insulated.

Optional Construction

Extra flexible, higher strand count

Other Available Builds

Jacketed 2 or 4 conductor → see also [multiconductor unshielded - audio](#)

Direct burial rated for outdoors or underground

In-wall CL2/CL3/FT4 75°C for inside wall installations.

In-wall with parallel Cat5E → see also [category cable](#)

Plenum CMP/FT6 80°

Sycor Part No	No. of Cond.	AWG	Strand.
